Communications Committee Report

After the job description and timeline for implementation was presented at the January board meeting, the Communications Portal Administrator position has been approved and the Administrative Committee has offered the job to Roy Degler (OK). Roy is currently working with MPLA Webmaster Dan Chaney on a Web hosting service for both the Portal and the MPLA Website. We are currently working on the first two components of the Portal to go live: the discussion forums and the blog. At this time we are seeking Content Managers to be moderators for the forums and assist Roy in the development of the Portal.

Respectfully submitted,
David Oberhelman
