

SE-3

MPLA Government Documents Section  
February 2006

At the October conference, the section brainstormed on potential program ideas for the 2007 MPLA/NMLA Conference. These included government documents in Spanish, U.S./Mexico border in government documents, developing a panel discussion of regional depository librarians, the U.S. Census, and a panel discussing issues related to government information in the MPLA area. Also discussed was the idea of a pre-conference on government information with different tracks for different types of libraries.
