Portal Applications and Support Sites

- Current applications include (new in bold):
 - Dan and I launched the MPLA officers election. Very few problems- bounced emails, small template errors, and only one reported operational problem voting. Turn out seemed very good compared to last year.
 - Just renewed hosting account through HostGator, I will get the invoice to Judy.
- Site Maintenance
 - Weekly back-ups created every Friday and stored on local hard drive.
 - I have deleted some of the old backups.
 - Security vs Spam- Still had trouble with meet.mpla.us but addition of second module stopped spam. Spam accounts are captured for my deletion.
