

WM
MPLA Webmaster Report
30 August 2016

Nothing much major to report regarding the website.

1. Roy and I conducted the recent MPLA Officers election online. There were some minor glitch issues with the operation this time which we hadn't experienced before. Roy said it's due to the limits of the freeware we deployed to manage the election ballots. Neither of us is certain that the glitches are worth paying for a different bit of software to conduct elections.
2. We renewed the MPLA domain name, mpla.us, for a period of 9 years. So, we need to remember to renew the domain name before 01 November 2025. I've added that to my Outlook Calendar 😊

Respectfully submitted,

Dan Chaney
MPLA Webmaster
